1.Enabling the module

To enable the module go to Stores→ Configuration→ Auction→ Module Enable→ Yes

General Configuration

Module Enable
[global]

Yes

Enable Reverse bid auction module.

Auction Page Show/Hide
[store view]

Yes

Enable Reverse bid auction Page module.

Auction Page Menu Label
[global]

Auction Test

Ex. Auction

2.Enabling attributes of product for Reverse Auction

This step is NOT necessary for 'Default' attribute set, as it will be already assigned to the 'Default' attribute set. Fill the below values and save the product.

Reverse Auction

Available for auction
[store view]

☐ No

Start date
[store view]

Add bid start date with 24 hours time format Ex: mm/dd/yyyy hh:mm:ss(05/01/2017 13:10:10)

End date
[store view]

Add bid end date with 24 hours time format Ex: mm/dd/yyyy hh:mm:ss(05/01/2017 18:30:00)

Bid Minimum price
[store view]

Bid Claim days
[store view]

Continued...

If the attributes are not set in the selected attribute set please do the following step. Go to Magento 2 Admin > Products > Catalog > Add new product. here you can see another button in top right corner called Add attribute. This step will be required only for the first auctionable product configuration. For the rest of the products, it would be there.

The screenshot shows the 'New Product' page in the Magento 2 Admin interface. On the left is a sidebar with navigation links: DASHBOARD, SALES, PRODUCTS, and PIERRE FAY CONTACTS PARENTS. The main content area has a header bar with the title 'New Product' and three buttons: '← Back', 'Add Attribute' (highlighted with a red box), and 'Save'. Below the header, there are several configuration sections: 'Advanced Pricing' with a '[global]' dropdown, 'Tax Class' with a '[website]' dropdown set to 'Taxable Goods', 'Quantity' with a '[global]' dropdown and an empty input field, 'Advanced Inventory' with a '[global]' dropdown, and 'Stock Status' with a '[global]' dropdown set to 'In Stock'.

3.Setting up the Auction Menu option and Page Title

Auctions can be displayed on a separate page and required menu label and page title can be set for the page.

To do this go to Stores→ Configuration→ Auction-->Reverse Bid

Auction Page Show/Hide
[store view]

Yes

Enable Reverse bid auction Page module.

Auction Page Menu Label
[global]

Auction Test

Ex. Auction

Auction Page Title
[global]

Auction test page

Ex. Auction

10.How does Auction with Lowest Bid works?

- 1.A new product is created to make it as an auctionable product or make an existing product auctionable by choosing Reverse Auction condition to be 'Yes'.
- 2.The product will be auctionable for the time interval specified.
- 3.User cannot place bid less than the specified amount.
- 4.User can place any amount of bids,but the last placed bid will be counted.
- 5.Only the lowest and unique bid will win the auction.
- 6.The winner will be sent an email notifying him of his/her win.
- 7.The winner can then add the product to his cart at the bidding price.
- 8.This is quite useful as costly products can be bought at the price of nothing.

11.Email received by winner

Dear Veronica Costello,

Your bid amount of 12.45 has been confirmed for the Reverse Auction Reverse Auction . Please Buy this product within 3 days.

Thank you

Thank you!
