

USER GUIDE

Stock Status for
Configurable Product

INTRODUCTION

“Stock Status for Configurable Product” is an easy and powerful Extension for Magento for any online store. It enhances the ‘Magento Product Detail Pages’ with ‘Product Stock Status’ & shows available quantity of the configurable products in the stock.

This extension enriches your standard Magento functionality by providing customers with much more information about the stock status. Along with that this Extension allows admin to create custom product stock label. Admin can enable or disable this extension from admin panel as well. One of the best characteristic of this extension is it works great with configurable products that have multiple options. For a configurable product, this extension adds facility to have stock quantity of configurable product options. With ‘Stock Status for Configurable Product’, Customer can get the information about the sold out products as well without any hassle. Besides, it also shows the shipping countdown based on the order cut-off time.

STEP 1 - INSTALL EXTENSION

1. Download and unzip the extension file which you received after purchase.
2. Upload the unzipped folders to the Magento root folder.
3. Go to "System", then "Cache Management".

The screenshot displays the Magento Admin Panel interface. At the top, there is a navigation bar with tabs for Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, CMS, Reports, and System. The 'System' tab is highlighted, and a dropdown menu is open, showing various system management options. A red arrow points to the 'System' tab, and another red arrow points to the 'Cache Management' option in the dropdown menu. Below the navigation bar, the 'Manage Products' section is visible, showing a table of products with columns for ID, Name, Type, Attribute, and Qty. The table contains several rows of product data, including 'Plaid Cotton Shirt-Royal Blue-L', 'Plaid Cotton Shirt-Royal Blue-M', 'Plaid Cotton Shirt-Royal Blue-S', 'Plaid Cotton Shirt-Red-L', 'Plaid Cotton Shirt-Red-M', 'Plaid Cotton Shirt-Red-S', 'Plaid Cotton Shirt-Khaki-L', and 'Plaid Cotton Shirt-Khaki-M'. The 'Cache Management' option is highlighted in the dropdown menu, indicating the next step in the installation process.

ID	Name	Type	Attrib.	Qty
905	Plaid Cotton Shirt-Royal Blue-L	Simple Product	Clothing	\$160.00
904	Plaid Cotton Shirt-Royal Blue-M	Simple Product	Clothing	\$160.00
903	Plaid Cotton Shirt-Royal Blue-S	Simple Product	Clothing	\$160.00
902	Plaid Cotton Shirt-Red-L	Simple Product	Clothing	\$160.00
901	Plaid Cotton Shirt-Red-M	Simple Product	Clothing	\$160.00
900	Plaid Cotton Shirt-Red-S	Simple Product	Clothing	\$160.00
899	Plaid Cotton Shirt-Khaki-L	Simple Product	Clothing	\$160.00
898	Plaid Cotton Shirt-Khaki-M	Simple Product	Clothing	\$160.00

4. Choose "Select All" and then click "Submit" to clear cache.

COMMON ISSUES DURING INSTALLATION

After I Installed the Extension, the Store Gives an Error or Blank Page:

- Change the owner of the extracted extension files to the web server user and set 775 permissions on them.
- Clear the store cache and try again.

How to Clear Your Cache:

- After installing or uninstalling extensions, it is recommended to clear your cache. It is more preferable to flush your Magento store cache by deleting all the content in `/var/cache/`.
- You can clear it via Backend -> System -> Cache Management: select all cache types, then choose the Refresh action and click the Submit button. *Don't forget to*

Cache Storage Management Flush Magento Cache Flush Cache Storage

Select All | Unselect All | Select Visible | Unselect Visible | 2 items selected Actions Refresh Submit

Cache Type	Description	Associated Tags	Status
<input checked="" type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	ENABLED

re-login after both these procedures.

How to Make a Database Backup:

- Before you make any changes, it is recommended that you backup your data first. In Magento, you can use a native backup tool in Admin Panel -> System -> Tools -> Backups.
- Click the Database Backup button - the tool is now copying the data from your store's database to your local database.
- The Magento backup file appears in /var/backup/ after

	Time	Name	Size, Bytes	Type	Download	Action
<input type="checkbox"/>	Apr 24, 2013 4:00:01 AM		4150231	Database	gz (The)	Rollback

the procedure.

How to Enable Error and Exception Logging in Magento:

- By default, Magento does not register messages about errors and exceptions; so if something bad happens, you won't even know.
- To turn on the logging, you can navigate to System -> Configuration -> Developer -> Log Settings and set the Enabled option to Yes.
- Don't forget to set full access permissions (777) to the following folder: /var/log, since that is the place where those log files are stored.

Log Settings	
Enabled	Yes
System Log File Name	system.log ▲ Logging from Mage::log(). File is located in {{base_dir}}/var/log
Exceptions Log File Name	exception.log ▲ Logging from Mage::logException(). File is located in {{base_dir}}/var/log

How to Re-Index Your Data:

- In order to re-index product catalog data, go to System ->

Index Management.

- Select all elements, choose the Reindex Data action and click the Submit button. It is not necessary to re-login to

Index Management

Select All Unselect All Select Visible Unselect Visible 2 items selected				Actions		Reindex Data	Submit
Index	Description	Mode	Status	Update Required	Updated At	Action	
<input checked="" type="checkbox"/>	Product Attributes	Index product attributes for	Update on Save	READY	NO	Mar 26, 2014 8:19:42 AM	Reindex Data

complete the operation.
